

x	1	2	3	4	5
$f(x)$	10	11	12	13	14

The table below has a horizontal line between the first and second row and the entries are right justified:

x	1	2	3	4	5
$f(x)$	10	11	12	13	14

The table below has verticle bars separating the columns. A double bar separates the first and second column.

x	1	2	3	4	5
$f(x)$	10	11	12	13	14

$$50 = 5.48\sqrt{d} \tag{1}$$

$$\frac{50}{5.48} \approx 9.1241 = \sqrt{d} \tag{2}$$

$$d = 9.1241^2 = 83.325 \tag{3}$$

$$50 = 5.48\sqrt{d}$$

$$\frac{50}{5.48} \approx 9.1241 = \sqrt{d}$$

$$d = 9.1241^2 = 83.325$$
